Finance 360 leads you to a successful career in risk management!

**Finance 360 — Principles of Insurance and Risk Management**

A course designed to serve your insurance needs
Prerequisite: Finance 320

Who is eligible to take Finance 360?
All business major students are eligible for this course.

What will you learn?
The course begins with an overview of the insurance industry, including the operation, distribution of products and insurance regulations. You will learn the framework and techniques of risk management, how to read insurance policies including auto, homeowner, business, life and health insurance. Students will also pick up tips for insurance shopping. The course will teach you how to deal with employee benefits packages such as group life and health insurance and various retirement plans, and will direct you in integrating personal risk management plan into the financial planning process.

The course will teach you:
1. How to shop for your auto or life insurance through the internet;
2. How to read and understand your own insurance policies;
3. What you should do after a car accident or a fire;
4. What kind of job opportunities are available with an insurance company.

**Guest Lecturers include:**
1. Executives from insurance companies
2. Claim adjusters and underwriters
3. Insurance brokers and agents
4. Successful CSUF alumni in the insurance industry
