A candidate's initial attempt at a section is labeled as a First-Time (FT) event; all subsequent attempts to retake that particular section are labeled as Re-Exam (RE) events. It is entirely possible for a given candidate to have both FT and RE events for multiple sections of the test or to have exclusively FT events for some sections and exclusively RE events for others. Candidates often require multiple attempts (events) before passing a particular section.

A candidate's status as FT or RE is evaluated on a section-by-section basis. Candidates are considered to be FT candidates the first time they take a given section. If a candidate fails that section, then the candidate is treated as a RE candidate for all subsequent administrations of that section. By definition, candidates can have only one FT event per section but can have multiple RE events for each section. Event-level passing rates are calculated as the number of passing events (either FT, RE or combined) divided by the total number of events (either FT, RE or combined).
