Marketing - Market Research

Do you enjoy gathering information on current and potential customers or competitors? Does analyzing data on market conditions appeal to you? A career in market research may be a good fit for you! Market research involves figuring out what makes people buy things. This includes conducting investigations into product successes and failures in the market, as well as market trends, characteristics, purchasing habits, and business needs. Through quantitative and qualitative research methods, a market researcher also obtains customer opinions, then evaluates and interprets the data to provide recommendations for their company's success.

An individual in market research must be comfortable with conducting detailed research, generating reports and statistical charts, and presenting their findings. Successful market researchers have keen deductive and inductive reasoning skills, as well as strong written and oral communication.
