Professor Dipasri Ghosh 657-278-4821 | dghosh@fullerton.edu
WHAT IS TITAN CAPITAL MANAGEMENT?
12-month practicum where students act as research analysts, portfolio managers, economists, and risk managers for a portfolio of stocks or bonds. Each portfolio is funded by the California State University Philanthropic Foundation providing assets under management of over $1.3 million as of June 2018.

WHO WILL ATTEND THE CONFERENCE?
Investment students from universities across Southern California are invited to the TCM Student Investment Conference: CSUF, Cal Poly Pomona, Chapman University, UCI, UC Riverside, CSULB and others. These universities run student managed investment funds where participants get hands-on experience managing stock and bond portfolios. Workshop hosts, sponsors, and judges have the opportunity to observe these high-potential students in an interactive setting applying both technical and interpersonal skills. Firms seeking interns or entry-level hires are welcome to discuss opportunities at their firms and distribute information for follow-up meetings with targeted students.

WHAT WILL IT COST?
Sponsorships help cover the cost of putting on the conference plus funding scholarship awards for winners of the Seeking Alpha investment competition. Sponsors are also encouraged to judge the competitions and/or host interactive workshops on an investment topic within their expertise.
